

Quality

NORC ist qualität. That's right. NORC is quality. Leading-edge German research, development & manufacturing define NORC products. We are not about making imitations. We are about engineering *quality* **from the ground up**. Our obsession with quality includes subjecting our products to a battery of comprehensive quality tests before they can bear the NORC name and begin their journey to our quality-conscious customers. NORC products meet and/or exceed the quality benchmarks set by international standard-setting organizations and the world's leading manufacturers & OEMs.
