

# Why NORC

**NORC products are researched, developed and made entirely in Germany.** NORC automotive, marine and industrial products meet and/or exceed international quality standards such as those set by API, ACEA, ASTM, BS, JASO, ILSAC, ISO and others.

The quality control production system at Nano Oil Refining Company GmbH guarantees **quality & performance consistency** as well as ensures **NORC products meet the service requirements of the world's leading manufacturers & OEMs.**

NORC products mirror the heritage of our research & development expertise and the insights we have gained from our presence in the German market.

We also believe that **our understanding of the demands of the Middle East market is second to none**, thanks to the breadth of experience & depth of knowledge of our key people. The fact that we have already become one of the primary suppliers to several clients based in this exciting part of the world is proof of the superiority of NORC products.
